NOTE.—The Collector will find in this Catalogue a mass of useful information given by no other catalogue known to us. We divide and price separately all minor varieties of perforation, watermark, and type, and thus enable the collector to discover the value of rare varieties he may possess, and which are not given in any other catalogue.

In issuing the New Edition of our Priced Catalogue, we wish to draw attention to the chief alterations made therein.

After a trial for some years of small illustrations, we have come to the conclusion that they are not suitable for the *leading Stamp Catalogue*, chiefly from the fact that when they have been used in printing two or three large editions of this work all the fine lines wear out, with the result that, in many cases, the young collector has had great difficulty in identifying varieties. We therefore decided to go to the great expense of inserting new and exact-sized illustrations throughout our Catalogue. The cost has been close upon £800, and we leave our readers to judge whether the result is not greatly superior to any that has hitherto been attained by similar trade lists. A comparison of this new edition with any other catalogue will, we venture to think, conclusively prove that for general get-up and for beauty and clearness, it far excels any previously published.

We are rather sorry to say that, in order to place the large illustrations in double column, it has been necessary to enlarge the catalogues by about an inch, both in width and length.

In this edition also a more expensive paper is used, which, being thinner than that in former use, is better adapted for bringing out the type and illustrations more clearly.
